

Martin Ndegwa

Full Stack Web Developer

👤 Profile

I am a passionate Software Developer currently working for a remote company in the position of a Full-stack Developer. I have developed relevant skills in analytics and development through the years of studying and working. I am self-motivated and open-minded to garnering new knowledge, a technology enthusiast, result oriented and a team player. I am very passionate about secure software development and information / cyber security.

In addition I am currently a student awaiting graduation towards completing a Bachelor's Degree in Information Security and Forensics at KCA University.

📁 Employment History

Systems Developer at Aphicons Investments, Nairobi

March 2021 — Present

- I have Worked on Various projects as the Lead Developer, solely designing and developing systems/sites.
- I have interacted with clients in the Software Development Process, during the SDLC leading to a great increase in sales for the clients, wider demographic reach and developing products that give the clients a competitive edge in their various markets.
